

EXTRALITE®

ExtraLite is a bauxite based light weight synthetic proppant. It is used in the fracturing process of oil and gas wells, at high closure stress, over 10.000 psi.

Particle Sizes
#20/40, #30/50, #40/70.

LWP

Properties	Sieve	20/40	30/50	40/70
		% Retained		
Quantitative Phase Analysis, %	Corundum Al_2O_3		92.0	
	Iron III Aluminum Titanium Oxide $FeAl_3TiO_5$		4.8	
	Microcline $KAlSi_3O_8$		2.8	
	Rutile TiO_2		0.4	

Typical data are measured in accordance with ISO 13503-2 and 13503-5
